Personal Trauma Pouch

The Personal Trauma Pouch helps to provide an immediate response to a medical incident. Lightweight and discreet, it includes the very best in proven, effective equipment.

Contents:

- Gloves - for personal protection
- Face shield - for performing mouth-to-mouth resuscitation
- Tactical tourniquet - for early management of catastrophic limb haemorrhage
- Nasopharyngeal airways - for simple airway support
- Chest seal - to manage open chest wounds
- Modular pressure bandage - an excellent wound dressing with further haemorrhage control features
- Haemostatic dressing - to assist with clotting of blood, thereby reducing blood loss
- Light stick - to either see or mark a casualty's location

The Personal Trauma Pouch can be discreetly fitted to a belt, leg rig, tactical vest or body-armor, or attached to the outside of equipment bags for added versatility.

The Personal Trauma Pouch has a Velcro® closure and thumb loop, enabling it to be opened quickly and with a single hand.

Specification:

- Dimensions: 17cm x 12cm x 7cm
- Weight Fully Equipped: 380g
