

PROMETHEUS OMNISPLINT™

Lightweight aluminium foam splint

Description

The Prometheus Omni Splint™ is a malleable closed cell foam splint with an aluminium backbone. It has a number of beneficial features such as being;

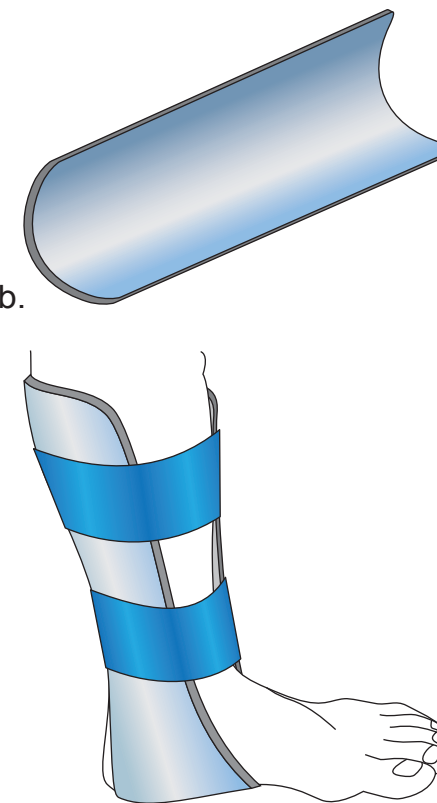

- Waterproof
- Latex free
- Lightweight and compact
- Radiolucent
- Secured in place with tape or bandage of choice
- Closed-cell foam allows for simple cleaning and disinfection.

Contains: One 91cm x 11cm (open), 11.5cm x 8cm x 8cm (roll packed).

Instructions for Use

1. Unroll the splint and flatten it.
2. Create a 'C' shaped bend along the length of the splint. This provides extra strength when immobilising the limb.
3. Apply the splint to the fractured limb so the fracture is between the two sides of the splint.
4. Adjust the shape of the splint to conform to the limb as required and secure with bandage or tape of choice.

CAUTION

Non-sterile, flammable.
